RapidRedact electronic redaction software all set to expand through Southern Africa.

Carat Business Solutions, has recently signed an agreement with Australasian company **Onstream Systems** to distribute their groundbreaking redaction software, **RapidRedact™** through Southern Africa. This innovative software perfectly complements Carat Business Solutions' range of services for law and legal firms, engineering, consulting, and accounting companies in Southern Africa.

A regional leader in the provision of business process, document, records and image management solutions, they specialise in providing customers with easily deployed multiple line-of-business web-based applications and enterprise wide content management initiatives.

Carat Business Solutions' range of products and services has been developed under ITIL (IT Infrastructure Library) best practice methodologies (BS15000 approved and ISO certification is pending).

Its services include: business process management, universal content management, record management, document transformation management, imaging solutions, IT infrastructure, regulatory compliance, ITIL and Carat DMS.

Carat Business Solutions is based in South Africa's garden province, Kwazulu-Natal.
